

Authentic Science

Shoucai Pan

Beijing Hongtai Culture Art Development Center Flat, Southwest Transportation University, Chengdu, China

Abstract: Authentic science is the sacred science, i.e. through strict definition of the science. Only through definition, science is people can believe in the truth and worthy of the name is selfless, so it is sacrosanct. That's beyond, in heaven and earth, no longer have the truth, also there will be no sacred thing. Hence, after the definition of science not only lead people to truth, moreover, invincible brings you success. No, lead your holy!

Keywords: *Authentic Science, The Freedom Kingdom, Inevitable Kingdom, Science-Ideal Country, The World Datong, The Truth Philosophy, Absolute The Truth, Sacred Science*

I. INTRODUCTION

Editor's note: In the past without the accurate definition of 'free kingdom', this paper uses the word of the Freedom Kingdom instead of free kingdom. In this paper, with the 'Datong' word is on behalf of: the Great Harmony, Great Unity, one world, TATUNG, Daid, utopia, and so on.

Grand Science Kingdom includes inevitable kingdom and Freedom Kingdom. Unlike in the past, inevitable kingdom respectively with Freedom Kingdom was defined as follows:

If the human history so far -- science to obey politics, is defined as the inevitable kingdom; so politics obey the science of human society, is called the Freedom Kingdom.

But, so far in human history, there is not inevitable kingdom and Freedom Kingdom accurate definition.

The new science of science research shows that the definition of the two kingdoms and does not define the result and significance, as well as social function, it is very different.

This article, it is on the basis of language unified specification defines, in depth discussed and summarized objective laws of the inevitable kingdom and Freedom Kingdom of the theory and practice aspects.

This kind of guiding significance is lie in, directs and declare publicly human beings, to rely on, learning, publicity, research, using the theory of new science of science, how to get rid of the "inevitable kingdom", exploit the Freedom Kingdom of the social theory, and how the operability of the practice of 'the Freedom Kingdom' regime, unify the world, achieve Datong -- world Datong -- science ideal country -- The only home to return to human society!

So, the new science of science is the highest and largest human management science, unity and standardization management of all human without exception.

II. INEVITABLE KINGDOM AND FREEDOM KINGDOM

A. About new science of science

So – called the new science of science that is "the new progress in science of science" [3]. New science of science, namely science of science in the 21st century, than in the 20th

century, has bigger progress in theory and is substantial progress.

So - called the science of science that is the science about the science. This is the accurate definition about the science of science.

Science of science must first to the people to answer: what is science?! (At least with accurate definition to answer)

Science of science, and then to the people to answer: what some characteristics, contents, methods, science has, mission, social function and rules and so on?

New science of science of the main scientific contribution has four:

First, the new science of science gave out the accurate definition of science, as shown in the following.

Second, take the lead in creating the science of the four cardinal principles: "clear concept, accurate definition, reasonable logic and strict rules".

Third, summarized scientific two basic rules:

Science the first basic rule: don't define equal to don't understand, if there is no definition, you have no right to speak, so for you choose can only is to learn.

The second basic rule of science: no time space view, you also have no right to speak.

The reason is simple: you do not have the space-time view in public, but you have a hidden space-time view. For example: God, Islam, Buddhism, hazy, and so on.

Use hidden time-space to speak, is a kind of cheating! Not allowed in the future.

Our humanists in the global platform of public opinion, there are a wide range of voice; never care about what time space view.

Oh! Your that is inevitable kingdom, up to 2012 years of human history. With the issue of new science of science, human since 2013 is began the Freedom Kingdom.

There are a lot of story in the Freedom Kingdom: every sentence is the truth, every word in science, welcome friends to take charge of or a guest.

So, in the Freedom Kingdom, there is no time space view you have no right to speak.

But, was born, I have no time space view - someone said.

You need to learn a concept, such as scientific or other space-time view, and then you can speak.

In short, no time space view, science of science down your voice.

Fourth, in the science of science, there are a lot of academic achievements. For example, to create a human grand unified philosophy - the truth philosophy; Created the lingua franca of

Datong world and global universal "Grand Science Dictionary" and so on.

B. The disadvantage of science of science in the 20th century

In 1939 Bernal (British) with an article "social function of the science", won the authority laurel of of the science of science in the 20th century.

But, still J.D.Bernal (English), in the later in "Science in History" [1] concluded that: "science is not a fixed can be defined once and for all the single one". Still later, in 1965, when held the 11th international conference on the history of science, J.D.Bernal (English) delivered his opening speech at the meeting, entitled "on the road to the science of science" [2] said, for science or the science of science, "we also have no need to do a strict definition".

The above has shown that: J.D.Bernal (English) doesn't define science.

Then, according to the new science of science requirement, has shown that he doesn't understand science. J.D.Bernal's "scientific social function" is so so, inevitable specious and invalid.

Humans came to the 21st century; the social function of new science of science has made remarkable progress, as follows:

C. The social function of the new science of science

The social function 1: science unified standard to manage the (global) politics

The social function 2: science can close global all ruler firmly into iron cage

The social function 3: science to unify and standardize global language and words

The social function 4: science by theory for testing the truth

The social function 5: science creates the universe space-time view

The social function 6: science to unify and standardize the management of philosophy

The social function 7: science to unify and standardize the management of the natural sciences

The social function 8: science to create human thought and doctrine of the grand view garden

The social function 9: science to structure human society the highest productivity

The social function 10: science to create human happiness ideal country -- science Datong -- Freedom Kingdom -- the only home to return to human society

1. The relationship of Science and politics

In the inevitable kingdom, due to the 'science and 'politics' are not accurate definition, so the logic of science obey politics is established; but to the Freedom Kingdom, due to the accurate definition, the logic of politics obey science is set up.

2. The world philosophy first paradox

After all, science is subject to politics or politics obedience science?! -- This is the world first paradox of philosophy.

If yes, almost all of the answer will be: science to obey the politics.

Furthermore replies: science is to serve proletarian politics, and a good service.

However, took almost everyone by surprise, science answer will be completely opposite: politics must conscientiously obey and serve the science, shall not be any mistake.

Thus in the human philosophy, there is the unprecedented problem -- the world philosophy first paradox: after all, science is subject to politics or politics obey science?!

This paradox is like hang a interlink lock at paradise's big door. Who can unlock paradise lock, naturally who can enter heavenly nice new life?

The study of new science of science shows that the following three conditions all can't open the paradise lock:

The first kind of circumstance: all humanity philosophy, without exception, all can't open paradise lock.

Some people don't believe it? Try your philosophy!

The second case: all activities for all of humanity, including past, present and future activities, are all helplessness -- to open the heaven lock.

So, practice - sole theory of the countenance go toward where put?!

The third kind of circumstance: A-Q is afraid of unlock, because from now on will be cut off revolutionary slogans livelihood.

But the new science of science, using of science and technology -- the first productive force, open the heaven lock, like flick the wrist and supinate to be as easy:

If your science to obey the politics, this suggests that:

First, you politics will be certainly not science!

What does that mean unscientific politics?

-- Ignorance and barbarism, the fuck is that ignorance!

Second, at least you don't understand the science, is the eternal truth and sacred science!

Don't believe it? How would you define science?

To definite the science, is your academics' things! -- Some people say that.

That --, are you eat cooked rice?

Third, you can't avert suspicion "devils - traitors logic".

What is "devils - traitors logic" ?

Please see the movie: bong...bong...folks listen up...imperial army this time into the village...East Asia co-prosperity...bong...bong...

Stripling is no experience, impossibly to understand this -- film.

Old faction, will understand, this is called the "devils - traitors logic"!

If your politics to obey science, not only shows that your politics is scientific, also shows your the spiritual civilization is Global One.

"Spiritual civilization Global One", this will be the human a cross-century systems engineering subject.

"Spiritual civilization Global One", also will be human Freedom Kingdom -- Datong world of leaders' the preferred characteristic.

It is sad, inevitable kingdom -- the real world, those people, windbaggary "spiritual civilization", have no idea to unlock, whether on the streets in human long history performs, chaos Chegal (Chinese), ocean's eleven by a trick -- the skit?! Seemed in this world, only his mother and father gives her a selfless head, and as well grows out a civilization spirit of face!

-- Slowly open eyes and slowly closed again, Lu xun (Chinese) and said.

With "the new progress in science of science"[3], published at home and abroad, has shown that, 'inevitable kingdom' -- "science to obey politics", that is up to 2012 years of human history, has already gone for ever.

Since 2013 the human started the Freedom Kingdom -- a new social form, in which human society of the politics to obey science, from then on, humans started a new historical course.

So, "science obeys politics" is the classic philosophy false proposition. In the Freedom Kingdom, people have to put an end to this statement. Instead of the statement is, politics must be honestly, exactitude, obey and service the science, can not have slightest mistake.

The reason is very simple, obeys the science, once has any mistakes and 'politics' immediately becomes a 'rule'.

So 'politics and 'rule' is completely different philosophical concepts, should not be mixed.

3. Science to unify global language

Thorough research shows that all human languages, historical reasons, without scientific and unified standard definition, logic itself is a vicious circle: "black is white, "good is bad, "revolution is counter-revolutionary "corruption is clean "science is also pseudoscience "relative is absolutely "the truth is fallacy" and so on logic is generally set up. So, this world there is no objective truth. All are, as long as you had a mouth, it is two layers of skin, how do you say how are right, strength is the commander in chief, fist's lie is the truth. -- This is the inevitable kingdom -- So far of the human history.

For example, people often say "science", because there is no definition, so is a pseudoscience, so, the logic of science is also pseudoscience formed naturally. So it's not hard to conclusion, inevitable kingdom there is no science at all. Also so, human everything is the question!

Again, for example, the black is a kind of white, so black is white logic is also established. And so on...

Because of all human languages are generally a vicious cycle, all cannot be used to accurately describe science and truth, so you must create a global universal language, this is the unified global language. This kind of language, logic itself is no longer a vicious cycle, thus it can be used to accurately describe science and truth.

Worth celebrating, this global universal language -- Datong lingua franca of the world, has been performed by new science to create.

4. Datong lingua franca of the world

In order to unify the global language, human predecessors have created hundreds of international artificial language.

But the new science of science research shows that hundreds of artificial language, including Esperanto, didn't do it "sound-shape-meaning" three unification and therefore all cannot be global universal. For example, a United Nations use Espranto written document, let 200 countries for translation, there will be 202 kinds of translation results. Among them, there is a result of God; also because some countries are two systems, there will be two kinds of results. Just because of these artificial languages, such as Esperanto, not realize unification of 'meaning'.

Datong lingua franca, however, because already take the lead to achieve the "sound-shape-meaning" three unification necessarily can be global universal. Such a United Nations document and also let 200 countries for translation, the translation result will be exactly alike.

So the Datong lingua franca of the world inevitably is global universal and successfully unified language around the world.

The text sample of Datong lingua franca of the world as follow:

Here is the Chinese song is expressed by the Datong lingua franca of the world "volunteer march" lyrics:

义勇军进行曲

Yip yskjpc jnd xyf quw

Qic llb	起来
Bub yrd zoh nuj li de rff mff	不愿做奴隶的人们
Bab wog mff xtg rbx	把我们的血肉
Vuh igb wog mffxnm de ihb igb	筑成我们新的长城
Vsu hwf nmh zun dkd lcc	中华民族到了
Zvx wze xmw de uiv hbf	最危险的时候
Qic llb	起来
Qic llb	起来
Qic llb	起来
Wog mff vjd vsh yia xne	我们万众一心
Mkx ve dif rff pkt hos	冒着敌人的炮火
Qmr jnd	前进
Mkx ve dif rff pkt hos	冒着敌人的炮火
Qmr jnd	前进
Qmr jnd	前进
Qmr jnd jnd	前进进

5. "Grand Science Dictionary"

Datong lingua franca of the world can be global universal, just because in the world take the lead to achieve "sound-shape-meaning" three unifications especially realizes the unity of 'meaning'.

The new science of science research shows that, the unity of 'meaning' is determined by the "Grand Science Dictionary" only. "Grand Science Dictionary" is global universal dictionary is different with the rest of the world.

"Grand Science Dictionary" also called "Datong Science Dictionary".

Worth people rejoice again, "Grand Science Dictionary" i.e. "Datong Science Dictionary" of the manuscript has been completed by new science compilation. According to the June 2012 edition of "the modern Chinese dictionary (6th edition)", included 13000 individual characters, 69000 words entry.

6. The creation of the "Grand Science Dictionary"

"Grand Science Dictionary" can be global universal, but the "Grand Science Dictionary" creation is very not easy. To be

sure, there is no level of the science of science in the new century no one could create "Grand Science Dictionary".

"Datong science dictionary" has three aspects of senior technical characteristics. Ordinary scholars could not attain the following three aspects of the technical characteristics:

The first characteristic: surpass the political and religious prejudice of the countries of the world, and worldly wise of the local condition customs of the peoples.

Second characteristic: cover the political and religious ideas of the countries of the world, and habitude of the local conditions and customs of the peoples

The third feature: cover and transcend the various countries in the world dictionary.

7. Compile "Grand Science Dictionary"

In addition to the advanced technical features, "Grand Dictionary" compilation itself is huge system engineering. So, there will be some difficulties in work. But as long as caught the 'key link', the problem will be a lucid exposition of an outline.

The new science of science research shows that the key links of language are the "five big king kong". The "five big king kong" is: 'science,'truth,'philosophy, 'politics and 'rule'.

As long as the five big king kong definition is accurate, all the rest of the language specification defines, all is very easy.

8. Five Big King Kong of the standard definition

1) The science of definition:

Science definition: objectively reveal nature, including human beings themselves and its society, of the inherent law of essence, through "Grand Science Dictionary" unified specification to define, the language and words, is the science.

Note: this definition highlights, science is originally language and words, no languages, no science. Your dim moonlight subjective thoughts (some knowledge of what the system), is not science. So, science is a thing after human languages. Before people have a language, there can be a technology, for example, monkeys have to climb trees technology, and cats have to catch mice technology, and so on.

Some people say, before humans have a language, the earth is in turn!

So, could you please tell me, "the earth in turn" is come out of your mouth, or from out of the donkey tail root?

If yes, the answer is yes: that from the donkey tail root come out is the donkey manure ball, although also can turn, but not the earth.

This kind of person because ideology malignant death cycle, already do not know: once "the earth in turn" came out from his mouth, it already is the languages!

2) The truth definition

There are two definition of the truth:

The first definition of the truth: the science is the truth.

The second definition of the truth: the eternal, absolute established and effective logic (philosophy) proposition (that is the effective logical language sentence), is the truth.

Comment a: although the two kinds of definition expression is different, But essence meaning identical.

Comment b: only after accurate to define science, "science is the truth" logic can effectively established.

3) The four basic attributes of science and the truth

Science and the truth all possess four basic attributes:

The first attribute -- immutability: all science and the truth is established in the eternal, in the past / present / future all were established, science and the truth, once found are all invariability.

The inference I: every development and changes of things, all are neither scientific nor the truth.

The second attribute -- absoluteness: all science and the truth must be absolute eternal only set up. and not as time, location, position, angle, view, and change.

The inference II: anything not eternal absolute only set up, and any theory of relativity, both are likely to be science and can not be the truth.

Editor's note: visible, Einstein's theory of relativity as well as the philosophical theory of relativity is neither science nor the truth, is an authentic pseudoscience.

The third attribute -- objectivity: all science and the truth is objective set up, do not include and exclude anyone's subjective will.

The inference III: Anyone's subjective will, no matter how glorious thought, how brilliant doctrine, how pious belief, thinking consciousness how deep and euphemism, both neither is science nor the truth, more not a philosophy.

Only through definition, science and philosophy is people reliable the truth, and be worthy of the name. Therefore is inviolable.

That's beyond, in the heaven and earth, there will be no the truth, also there will be no sacred things.

Academically, science divides the man's subjective will into "weak, medium, strong" level 3.

The weak level of subjective will, For example: "geocentric theory", "heliocentric theory", and so on, all reflects people subjective will of the weak level.

Medium subjective will, For example: "theory of relativity, "epistemology" and so on, all reflects people medium subjective will.

Strong subjective wills, For example, "idealism, "materialism" and so on, all reflect people subjective will of strong level.

Science of science clearly defined, man's subjective will, regardless of the weak, of the medium or of the strong level, all are not in the realm of science, thus a pseudoscience.

The fourth attribute -- supra - class: all science and the truth is supra - class, and then without class nature. The existence of science and the truth is not dependent on any class existence and objective existence; also not rely on any class's subjective will and then transfer.

The inference IV: so, anything with class nature, without exception, neither is science, nor the truth, more not a philosophy.

So visible, about Marxism, 'ism' is a typical people not only strong subjective will, and openly declared with a class nature, so, this kind of 'ism' is neither scientific, nor the truth, more not a philosophy.

4) Philosophical definition

The so - called philosophy is about the truth of a science (knowledge).

So it's not hard to deduce, the any, don't look for or can't find the truth, 'philosophy', all are give dogs wear snaffle -- random tighten! (给狗代嚼子--胡勒)

It is clear that inevitable kingdom's philosophy -- existing human philosophy, all is so. therefore, the end of inevitable kingdom philosophy has come to.

5) Political definition

Politics is the management of people, also.

Editor's note: this definition is given by China Sun Wen.

So, human only deserve to be called politician is the Sun Wen. That's beyond, humans per - existing any ruler, without exception, no matter Bagus Flyer, generation tianjiao or best generation of unique person, at best, all can only be the long history physiognomist, They are carrying on their back medicine gourd respective, and respectively operate a suit of punching and kicking -- very can be said to be warlock.

6) Political three natural attributes

New science of science of research shows that politics has three nature attribute:

The first attribute -- scientificity: this is the chiefly attribute of politics. The management of the people should first pay attention to science, rather than the others: what thoughts, what creed or doctrine.

Politics to pay attention to science is called the scientific politics, don't pay attention to science the politics is not scientific politics.

What meaning is unscientific politics? -- Ignorance and barbarism! After all it is ignorance!

The second attribute -- artistry: all political leaders have art of leadership, this is a political artistry.

The third attribute -- democracy: if and only if, when science is not clear the specification of the provisions, management of people can take the form democracy: for example, "the referendum, "the secret ballot" or to use the "lottery" way.

Oh, the democracy is originally to hide in here!

7) Rule definition

Rule: using preconceived some ideology, ideas or doctrine (include ism), to implement mandatory uniform management to the people, is called the rule.

8) The rule of three natural attributes

New science of science of the research also suggests that 'rule' also has three natural attributes:

The first attribute -- non-scientific: rulers, primary care about people unconditional obedience, regardless of the science or not, this is called the public management of non-scientific nature

The second attribute -- power tactics peculiarity: any ruler has corresponding governance power tactics.

The third attribute -- dictatorship peculiarity: a person in charge let no different opinion.

9) The creation of "Grand Science Dictionary"

The above "five big king Kong" and all other language and words of the unified specification defines included in a folder, this folder is the "Grand Science Dictionary".

"Grand Science Dictionary" i.e. the "Datong science dictionary", according to the June 2012 edition of "the modern Chinese dictionary (6th edition)", included 13000 individual characters, 69000 words entry, has been completed by science of science manuscript.

D. The inspectability of the science of science

Because of the first, science has the strict definition; second, the science has the fourcardinal principles; third, science has the basic rules, so new science has the inspectability: Theory testing science / truth / philosophy -- this is the sole criterion for testing science / truth / philosophy -- useless through practice of inspection link prior inspection science / truth / philosophy -- useless to surface inspection corrupt official corruption in advance!

So, science of science is to test you:

Is, true / fake servants of knocking at the door of the brick; the touchstone of test for the public or the private; Revolution or counter-revolutionary natural watershed; shine on a demon mirror also never fade -- all sorts of bad characters is immediately show oneself in one's true colours!

Science of science is not only testing anyone of any theory beforehand, and prior inspect anyone's behavior and every day. Without exception!

So so, science of science can close the global rulers firmly to the iron cage, only allow them to behave, they were not allowed be unruly in word or deed.

E. Science of science unified and standardized to manage mankind philosophy

From the philosophy of the 28th world conference grouping title, it can be seen that there is only one topic "Datong world" conforms to the philosophical content; the rest of the 98 title is full of pseudoscience, so all are fake philosophy!

Why is that?

Very simple, new science of science has inspection ability, test you beforehand, science or pseudoscience? True or false philosophy!

This suggests that human philosophy has very messy, very need science to standardized management and consolidation.

Deserves your lucky once again, human grand unified philosophy [5] -- "truth philosophy", has been performed by new science of science to create.

Now the introduction of the method and process of necessary to create grand unified philosophy:

First, human want to have a global universal language. The reason is very simple, human existing language of logic itself is a vicious cycle, cannot be used to accurately describe the science truth and philosophy.

Second, you must be familiar with the theory of the science of science.

Third, you must abandon anyone, including your, his, subjective will. The reason is very simple, determined by the objectivity: science truth and philosophy are not included and

exclude anyone's subjective will. Anyone's subjective will, no matter how glorious your thoughts; doctrine is how brilliant; belief how pious; mind how deep and euphemism, neither science, nor truth, more not is philosophy.

Sadly, almost all the people can't do! So the human philosophy is a mess now.

As a first step, create a grand unified philosophy need to create the universe/world existence axioms. The new science of science research shows that, not only the philosophy and all of the independent science, need to create the exist axiom at the very start.

The second step to create a grand unified philosophy is to create the space-time view.

Create space-time view should be the task of physics! -- Some people say that.

This kind of person just is inevitable kingdom to a vicious cycle of a typical ideology.

The new science of science go deep into research shows that, physical science [4] professional task is to study matter movement -- apply time space view. However, create original space-time view, should be the wisdom of philosophers.

Human so far, there is no real philosophy, precisely because they have no real philosopher.

Worth people rejoice again, the original time space view [5], have also been performed by science of science to create.

The third step is to give human found, find the truth.

Because of philosophy is in regard to the truth of a science.

Philosophers could wantonly promote your wisdom, after create space-time view, looking for the truth to human being.

Sadly, all philosophy scholars are racking their brains, hard develop their epistemology and methodology. All Don't know in any of epistemology and methodology is no philosophy.

F. Science to create human thought and doctrine of the grand view garden

Since any thoughts, doctrines, epistemology, methodology, is neither scientific nor the truth more not philosophy, so, they are put into the science of the grand view garden by new science of science, and are only for people to enjoy the sight of.

G. Science structure human society of the highest productivity

The new science of science study, science, only science, can construct the human society the highest productivity.

By contrast, human has all economists, is to serve a political tool, completely unable to construct the highest productivity.

III. SCIENCE CREATE HUMAN HAPPINESS IDEAL COUNTRY

The new science of science conclusion: despite the world amidst the winds of change, but they are unified after all.

Unified world of the logic method has two, and there are only two: one way is to force uniform, the other is a cultural unity.

Though there is a possibility, dominant country or strongman, using force unified global, but after unification inevitable carry out dictatorship. So this regime is not long.

So the unified global is actually only one possibility, this is to use the cultural unity global.

By culture unified global, namely science unifies all over the world.

CONCLUSIONS

Science unifies the world, that is, create science ideal country, namely science Datong -- Freedom Kingdom -- the only home to human society!

The new science conclusion: as long as the scholars take the lead in awakening, to save humanity, unify the world, realize the Datong, ten years is too long, seize every minute!

So work hard, my friend!! Datong world in waved to you.
